## Projects

### ● Restaurant Website

URL: [littlelemoncoursera.netlify.app](http://littlelemoncoursera.netlify.app)

Developed a responsive restaurant website using React.js as part of the Meta Front-End Developer Specialization on Coursera.

- Implemented features such as menu reservation booking, and landing page.
- Demonstrated proficiency in front-end development best practices, including accessibility enhancements and cross-browser compatibility.

### ● Personal Portfolio Website

URL: [girishsportfolio.netlify.app](http://girishsportfolio.netlify.app)

Created a portfolio website to showcase my skills, projects and qualifications.

- Developed a responsive website using HTML, CSS, and JavaScript.
- Showcased web projects and skills.

### ● Sign Language Translation Glove For Speech Disabled

Built a glove that could translate American Sign Language to audio using Raspberry Pi Pico and CircuitPython.

- Achieved 95% efficiency.
- Reduced cost by 30%.

## Strengths

- **Team Spirit**  
Playing basketball from a young age, I have applied these three concepts: lead by example, adapt my style according to team members, share the merit for success.
- **Problem Solving**  
While working on final year project in college, I learned things might not always go as planned, so you need to identify the problem, understand its complexities and solve accordingly.
- **Time Management**  
College life taught me how to be punctual, plan ahead and meet deadlines which has brought out a disciplined version of me.
